

Podiatry Regenerative Medicine Training Conference

Regenerative Medicine Adding Power to Podiatry

Regenerative medicine can be defined as the branch of medicine focused on the use of autologous biologics to promote the restoration of defective tissue with new healthy tissue. There are many aspects to this area, all of which will include the autologous use of a platelet-rich plasma, a bone marrow stem cell or an adipose stem cell biologic.

Autologous Biologics in the Armamentarium of Podiatric Medicine

A large percentage of the foot and ankle problems are repetitive strain injuries, developing from acute to chronic injuries. This excessive and repetitive strain often leads to inflammation of tendon, ligaments, and fascia. Conventional therapies consist of long-term steroidal, and/or non-steroidal injections/medications, and in some cases ultimately a surgical intervention. Chronic (diabetic) wound care patients are often treated with a magnitude of primary and secondary dressings, not often leading to full wound epithelialization. In severe cases and unsuccessful treatments, amputation is the mandatory.

The Podiatry Conference

During this conference, a renowned faculty will introduce new and innovative autologous biologic treatment options for a variety of podiatric indications, ranging from tendinopathies, degenerative-osteo arthritis, ligament/tendon tears, chronic wounds to critical limb ischemia. The data presented are based on individual experiences. The peer-reviewed literature also indicates safe, feasible and effective use of autologous biologics like PRP and mesenchymal/stem cells.

Program Agenda

DAY 1: Friday May 18th, 2018 4pm

- *The Essentials of Platelet-Rich Plasma Formulations as an Autologous Regenerative Biologic for Tendinopathies.*
- *Autologous Biologics in Podiatry Regenerative Medicine.*
- *Defining Regenerative Medicine and Clinical Sciences.*
- *Nerve Surgery in Podiatry.*
- *Plantar Fasciitis Treatments and Platelet Rich Plasma.*
- *Konica Minolta Ultrasound Workshop:*
Basics and Essentials of Ultrasound in the Application of Needle Guidance in Rheumatology

DAY 2: Saturday May 19th, 2018, 7am

- *Defining Innovative Care in Podiatry.*
- *Experience and Outcomes with Autologous Biologics in Osteoarthritis.*
- *Innovative use of PRP in Foot & Ankle.*
- *Steroids vs. Autologous Biologics in Tendinopathies.*
- *PRP and MSC's in Chronic Wound Care Management.*
- *Amniotic vs. Platelet Rich Plasma, what are the differences.*
- *Ultrasonography-Anatomical Lessons and Device Guidance for Joint Injections.*
- *Clinical Workshops:*
Azalea, Periwinkle, Hibiscus (3 groups).

Conference Registration (\$1,350.00)

Sanibel Harbour Resort & Spa, Fort Myers, Florida

\$250.00/person discount when registering office members as a group

KONICA MINOLTA
